Education

Aug 2014 – May 2018 **Duke University** *Durham, NC*
Bachelor in Computer Science *GPA - 3.55/4.00*

Work Experience

- Sep. 2017 – Present **GitHub** *San Francisco, CA* – Software Engineer
- Worked as a member of the Electron.js core team to add features and review feature requests, pull requests, and triage issues reported by the community.
 - Ensured that Electron releases were published on time and built automation tooling as the Chair of the Releases Working Group
 - Streamlined and released new versions of Node.js as a member of the Node.js LTS Release Team and Node.js Core Collaborator
- May 2017 – Aug. 2017 **GitHub** *San Francisco, CA* – Software Engineering Intern
- Improved performance and repository visibility permissions on GitHub and GitHub Enterprise.
 - Built an API to surface repository dependency data for users on GitHub and GitHub Enterprise.
- Jan. 2017 – May 2017 **Duke University** *Durham, NC* – Undergraduate Teaching Assistant
- Assisted students in learning concepts of discrete math as they relate to computer science as well as grading assessments and coding assignments.
- May 2016 – Aug. 2016 **IFTTT** *San Francisco, CA* – Software Engineering Intern
- Worked with Javascript and Ruby on Rails alongside members of the web team as they developed and launched several new products within the IFTTT ecosystem.
- Sep. 2015 – Dec. 2015 **Transloc** *Durham, NC* – Software Engineering Intern
- Worked with Javascript and Python to develop portions of the Traveler transit analysis product and built web tools for internal use within the company.
- May 2015 – Aug. 2015 **Embedly (acq. by Medium)** *Boston, MA* – Software Engineering Intern
- Used front-end development tools including Ember.js and Python to create a fully-featured administrative backend and significant portions of a new version of the company's web app.
